
torque axis redirector
shaft
axially flexible
precise length
propeller properties
proteins of adjacent subassemblies
rotary properties
its own proteins
peptidoglycan
outer cell wall
essentially round
stationary properties
axially balanced
low friction rotation
protein conduit
jigs, scaffolding, chaperones
torsional rigidity
round hole in middle
positional stability
required diameter
diameter of rotor shaft
custom proteins
new DNA genes & operons
sigma factors
activators
sensor proteins
logic proteins
communication proteins
enhancers
operators
new genes operons
repressors
enzymes chaperones
structural proteins
